## The Jabra BT800 – a revolutionary combination of design and cutting edge technology

### With the Jabra BT800 your phone becomes the accessory!

Innovative features are intuitively simple to use, giving you an immediate feeling of familiarity by mirroring the operation of your mobile phone.

All the features and operations you're familiar with on your mobile, are now available from the headset itself. Using just four controls – the mute button, jog wheel, 'Answer' and 'End' buttons – accessing the functionality you need is easy and natural. For example, the jog wheel – used for scrolling through menu functions in standby mode – becomes the volume control during a call. Soon it'll be second nature!

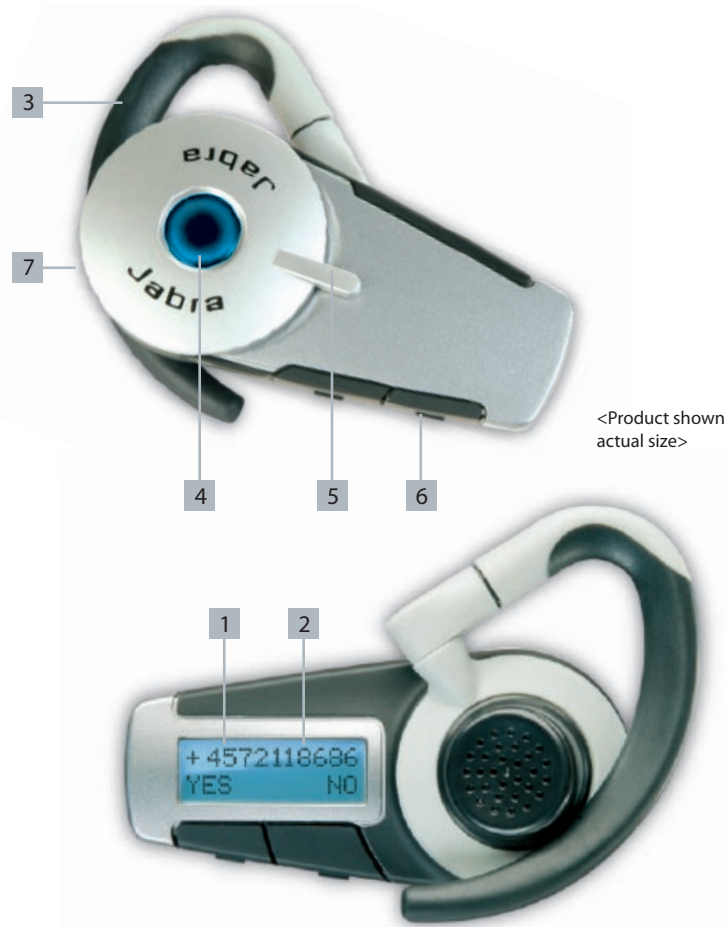

Unique to the Jabra BT800 is the blue backlit display, which shows 'Caller ID' on incoming calls so you know who's calling – no need to look at your phone. You can also view the phone's call list and menu options.

### Outstanding audio quality

The Jabra BT800's unique DSP (Digital Signal Processing) means that, whatever the environment, you are assured of optimum audio quality. DSP's automatic volume control compensates for noisy surroundings by increasing the listening level accordingly and noise cancellation technology means that the incoming caller can hear you more clearly.

The Jabra BT800's call vibrate/ring tone function enables you to select your favourite ring tone from the headset itself. Or if you prefer, simply set the Jabra BT800 to 'vibrate only', so you silently know when a call is coming through.

The Jabra BT800 is like no other headset – a revolutionary combination of design and technology designed for ultimate freedom.

#### 1 DSP (Digital Signal Processing)

Reduces background noise and automatically adjusts volume to suit your environment

2

**Display**  
Blue, backlit display shows 'Caller ID' on incoming calls and menu options

3

**Call vibrate / ring tone function**  
Select your favourite ring tones or choose the discreet 'vibrate only' for incoming calls

4

**Ear hook**  
Flexible, comfortable and secure ear hook pivots for easy fitting to either ear

5

**Mute button**  
To mute or un-mute headset during a call or, in standby, access menu options

6

**Jog wheel**  
For controlling the volume during a call or, in standby, scrolling through menu options

7

**Dedicated 'Answer' and 'End' buttons**  
Making call handling easy and the control of the display intuitively simple

7

**Charge from PC**  
Conveniently charges from AC power adaptor, car charger or PC with its own USB cable
