

ProBoom™

**The JABRA ProBoom™
delivers the finest sound
quality in its class plus
the convenience of two
wearing styles.**

JABRA®

LIVE LIFE HANDS-FREE

ProBoom™

1 Two wearing styles

The JABRA ProBoom™ offers two wearing styles – EarGel® or ear hook.

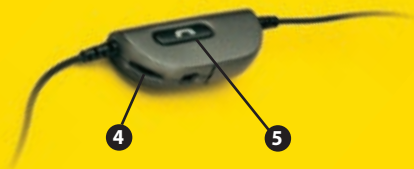

Either soft, comfortable locking EarGels which channel the sound into the ear canal, or the flex-forming ear hook. Both fit securely on either ear for hours of comfortable wear.

2 Microphone

Noise cancelling microphone for crystal clear conversations.

3 Boom

Ultra lightweight boom is flexible, durable and shaped to achieve optimal voice pick-up.

4 Volume Control

In-line volume control with amplifier, means volume is adjustable to suit the environment.

5 Answer/End Call Button

One-touch voice-activated dialling and answer/end button (if supported by phone).

A new standard of performance for hands-free headsets.

Everything about the JABRA ProBoom is designed for optimum sound quality so you enjoy crystal clear telephone conversations. The ultra-lightweight, full-length boom contains a noise-cancelling microphone. And your reception is enhanced by built-in electronic amplification that allows you to boost the volume beyond the level of the handset alone by the neat, in-line volume control.

All-day comfort and choice of wearing style

Designed for ultimate comfort, the versatile JABRA ProBoom gives customers a choice of wearing styles – either in the ear with JABRA's soft, patented EarGel or over the ear with a flex-forming ear hook. Both styles give a perfect fit and can be used on either ear.

Enhanced features to complement the latest mobile phones.

The JABRA ProBoom features an answer/end button for one-touch convenience which also provides voice-activated dialling when used with a suitably equipped phone.

Locking EarGels stay put as you move and talk

The patented EarGel is made of a unique, soft and washable material for hygiene, convenience and comfort. The EarGel is crafted to fit the contours of your ear and channels sound into the ear canal for the very best in listening clarity.

- Enhanced design for more secure fit on the earpiece
- Comfortable fit for longer wear
- EarGels come in small, medium and large for left and right ears
- Unique design does not block ear canal so you can hear outside sounds
